Absolute Secure Endpoint

Absolute Secure Endpoint leverages the always-on connection provided by Absolute Persistence® to enable IT and security personnel to monitor and address computers' problems and enables the computers and their mission-critical applications to self-heal. This helps with IT management, strengthening a company's security posture, and maintaining compliance.

1 Contact **Absolute Sales** to inquire about defining new custom device data points to be made available through the DataExplorer Library.

2 Apple M1 based Mac devices require Absolute agent version 7.15 or above to be installed to capture updated Encryption status details.

3 Only available for Chrome browser, on Windows and Chromebook devices.

4 Only available for **eligible Lenovo Devices**.

5 All scripts in the Absolute Reach library are supported on Windows, while certain scripts are supported on MacOS.

6 Self-healing of critical applications is available through Absolute Resilience. Contact **Absolute Sales** for more information.

7 Absolute is continuously adding to its Application Resilience catalog of supported apps. If you have a particular application that you would like to make resilient to external factors, contact **Absolute Sales** to make a request.

8 North American, UK and Australian Education Customers only. Terms and Conditions apply. See **FAQ** for more details.

9 Absolute Insights for Endpoints is available as an add-on module and requires an existing Absolute Visibility, Control, or Resilience subscription. Absolute Insights for Endpoints leverages device data points across multiple Absolute features. The product's OS support is directly related to that of the specific Absolute features which provide data to the product. Contact **Absolute Sales** to learn more.

/ABSOLUTE®

Trusted by more than 18,000 customers, Absolute Software is the only provider of self-healing, intelligent security solutions. Embedded in more than 600 million devices, Absolute is the only platform offering a permanent digital connection that intelligently and dynamically applies visibility, control and self-healing capabilities to endpoints, applications, and network connections — helping customers to strengthen cyber resilience against the escalating threat of ransomware and malicious attacks.
